In this connection I would make formsland function and the valuable assistance rendered me by the ladies of the city Bission in disburaing the fund appropriated by you for the render of the sufferers by the flood. So complete and satisfactory was the service they rendered that there has not reached me a single complaint from any quarter.

Bishop Van de Vyver.

Right Rev. Bishop Van de Vyver preached the second of his series of Lenten sermons at St. Peter's Cathedral on Sunday night.

The subject was matrimony and the Bishop gave a most forcible exposition of his Church's views as to the indissolubility of the parriage control.

ries exclusive of the Medical College.

Heavy PRESHETS.

The city was visited by heavy freshets in June and Aug 8 of last year, which did great damage to properly along the line of Shockee creek and in Recents. Upon my recommendation you appointed a commission of engineers to consider measures of relief and recommend some remedy against the recurrence of such disasters. I will await the report of the commission before making any further recommendation. It is very important, however, to the health of the entire city, but especially to the health of the entire city, but especially to the health and property interests of the flooded districts that prompt action be taken to prevent damage from another flood.

MECHANICS' INSTITUTE.

There is no money the city appropriates which yields larger returns for the amount invested than the money given to the Mechanics' Institute. Many boys and young men there obtain the instruction which develops their mental powers and fits them for positions of great usefulness. With timely and generous assistance this institute would soon develop into a great polytechnic school, and inere is no addition to our educational system more needed than such an institution.

PUBLIC HEALTH.

mortality was in the month of August; the low-est was in January.

The Board of Health in their annual report calls attention to the absence of any provision for the care of persons afflicted with small-pox and other contagious diseases. They strongly urge the erection of a reception hospital, where in case of an epidemic the sufferers, especially the pooter classes, would be better cared for and the death rate materially diminished. The cost of the maintenance of such an institution would be a small sum when compared with what the city would have to expend should an epidemic break out under present circumstances.

Gainage Chematory.

GARBAGE CREMATORY.

I submit berowith the annual reports of the several departments, which I comment to your careful persuas. They contain valuable suggestions which should be considered before you pass your appropriation ordinance. A careful examination now of the needs of the departments will avoid the necessity for additional appropriation during the year. the Place He Now
